练习7:连续优化

本练习指导用户完成以下步骤进一步细化置顶盒的模型: 1. 使用 Command Center 进行优化设计。

练习7:连续优化 Load (读取)项目"Tutorial 6B"并将其保存为"Tutorial ommand Center - FLOTHERM 4.1 Edit Chart Window 🖬 📾 🥵 🕺 🛍 📾 📢 7"。设置(Title)标题为"Simple design optimization"。 7 2 2 % Assigned Heat Source Rating Assigned
Gravity 在PM中,点击图标 T开 Command Center 窗口。 🛨 🌚 Global System Settings 🛨 🖧 Modeling 🛨 🌍 Overall Control Overal Control

练习7: 5	连续优化
记录"Best So Far"情况的细节信息。 MB_Comp1 Temperature=C Heat Sink Temperature =C Volume Flow =m ³ /s 将它们与练习 6 中的结果进行比较,您会发现散热器的设计有所改 善。	
通过选择'Graphical Input'标签,可看到散热器的几何形状,分别查看 5 种不同优化设计方案的视图。	Schward Carles 1101116 [11 41] John Schward Carles 101116 [11 41] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] Schward Carles 100 [11 10] Image: Schward Carles 100 [11 10] </td
